Vascular Interventional Radiology: Angioplasty, Stenting, Thrombolysis and Thrombectomy (Medical Radiology / Diagnostic Imaging)

Vascular Interventional Radiology: Angioplasty, Stenting, Thrombolysis and Thrombectomy (Medical Radiology / Diagnostic Imaging)

This volume focusses on the current evidence surrounding the use of endovascular therapy. It updates and complements the earlier Medical Radiology volume on the Radiology of Peripheral Vascular Diseases. Some background information is provided on vascular biology and the facilities required for safe endovascular practice, along with guidance on consent issues. Further chapters deal with endovascular treatment in particular arterial territories, and include the evidence in favour of or against the use of specific treatments. The most up-to-date evidence surrounding endovascular aneurysm repair is discussed. There are also chapters on venous interventions, including the endovascular management of varicose veins. This book will be of value both to interventional radiologists and to vascular surgeons with an interest in endovascular techniques.
