One of the Blood Crystals has found its way into the hands of Jarek Dravonich of the vampire enclave and the dark soul reaver is prepared to use the blood of Cadmus and Harmonia to bring forth a new kind of soul reaver. This new reaver is to be more powerful than previous soul reavers because of the immortal character of the blood which he must consume. Very few bloodsuckers are able to consume the blood of other immortals without consequence, especially if that blood belongs to the Elders or their progenitors. The vampires have located one such recruit, a young vampire from Russia, and soon his journey begins as he becomes one of the most powerful reavers to have ever existed. The Elders and werewolves must find a way to thwart the vampire plans that are being prepared, but they must first find a way in which to defeat the new soul reaver.

Blood of the Immortals: The Reaving Blade is the second book in a trilogy involving the Elders, werewolves, vampires, and other immortals that have been locked in a constant struggle of good and evil for millennia. The spawn of angel-kind, the Elders are the most powerful of the immortal races and consider themselves the primary protectors of the human race. They have made an alliance with the werewolves of Europe in order to stem the tide of the growing vampire threat throughout the world. As human governments of the world begin to see the war between the immortals, they too begin to find themselves locked in the chaos of battle. Lykaon, Scott, Rinolan, and others on the side of good must find a potent weapon in order to stop Jarek and his protégé Alexei from changing the world forever. Only time will tell if they are successful in their attempt and whether human governments including the United States will stand with them in their hour of need.
