Farewell America: The Plot to Kill JFK James Hepburn, William Turner

Originally published in 1968 in France under the title *L'Amerique Brule (America Is Burning)*, *Farewell America* quickly became a best-seller in Europe in eleven languages. It was the inside story of the assassination of President John Kennedy. Although borrowing heavily from published critics of the Warren Commission Report, the book describes the roots of the Cold War, the linkage between large corporate and banking interests, the ever-growing American intelligence apparatus, and the international petroleum cartels that were lined up with a bevy of military brass and Mafia chieftains against JFK.

A combination of these powerful interests called "The Committee" coordinated all aspects of the murder, from setting the time and place of the shooting to the recruitment of the gunmen and the coverup of the conspiracy afterward. The bottom line was that enemies of JFK collaborated with the CIA to erase the perceived threat to their interests by John and Robert Kennedy.

Heady stuff for 1968. So incendiary, in fact, that importation of the book through Canada was squelched, allegedly at the instigation of the FBI. *Farewell America* wasn't just another book about the assassination conspiracy; it bristled with restricted information about U.S. intelligence agencies, the White House, global business, and military and political affairs that had to have come from a knowledgeable source, in this case, French intelligence. It also represented the surreptitious intrusion by those in French government circles into American politics, namely, the 1968 presidential elections.
