**Quantum Mechanics in Chemistry (Dover Books on Chemistry)** George C. Schatz, Mark A. Ratner

Intended for graduate and advanced undergraduate students, this text explores quantum mechanical techniques from the viewpoint of chemistry and materials science. Dynamics, symmetry, and formalism are emphasized. An initial review of basic concepts from introductory quantum mechanics is followed by chapters examining symmetry, rotations, and angular momentum addition. Chapter 4 introduces the basic formalism of time-dependent quantum mechanics, emphasizing time-dependent perturbation theory and Fermi's golden rule. Chapter 5 sees this formalism applied to the interaction of radiation and matter. In Chapter 6, the authors introduce occupation number representations, including applications to both quantized radiation fields and electronic structure; while chapters 7 and 8 focus on scattering theory and basic theories of chemical reaction rates. The remaining three chapters deal with the use of correlation functions and density matrices in quantum mechanics. Problems and a bibliography appear at the end of each chapter; and at the end of the book there is an Appendix C, "Solutions to Problems," new to this edition.

**From reader reviews:**

**Virginia Villalon:**

Quantum Mechanics in Chemistry (Dover Books on Chemistry) can be one of your beginner books that are good idea. We all recommend that straight away because this guide has good vocabulary that can increase your knowledge in language, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to place every word into delight arrangement in writing Quantum Mechanics in Chemistry (Dover Books on Chemistry) yet doesn't forget the main stage, giving the reader the hottest along with based confirm resource information that maybe you can be among it. This great information can easily drawn you into brand new stage of crucial imagining.

**Anderson Austin:**

Your reading 6th sense will not betray a person, why because this Quantum Mechanics in Chemistry (Dover Books on Chemistry) guide written by well-known writer whose to say well how to make book that can be understand by anyone who all read the book. Written throughout good manner for you, leaking every ideas and creating skill only for eliminate your personal hunger then you still doubt Quantum Mechanics in Chemistry (Dover Books on Chemistry) as good book not just by the cover but also through the content. This is one publication that can break don't determine book by its handle, so do you still needing an additional sixth sense to pick that!? Oh come on your examining sixth sense already alerted you so why you have to listening to an additional sixth sense.

**Clifford Roselli:**

Reading a book to get new life style in this calendar year; every people loves to read a book. When you examine a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, due to the fact book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. If you want to get information about your analysis, you can read education books, but if you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, as well as soon. The Quantum Mechanics in Chemistry (Dover Books on Chemistry) will give you new experience in looking at a book.

**William Hayes:**

Many people said that they feel fed up when they reading a reserve. They are directly felt the item when they get a half portions of the book. You can choose the book Quantum Mechanics in Chemistry (Dover Books on Chemistry) to make your personal reading is interesting. Your skill of reading skill is developing when you such as reading. Try to choose straightforward book to make you enjoy to study it and mingle the opinion about book and examining especially. It is to be 1st opinion for you to like to open up a book and examine it. Beside that the reserve Quantum Mechanics in Chemistry (Dover Books on Chemistry) can to be your brand-new friend when you're really feel alone and confuse with the information must you're doing of these

time.
