Systematic Theology: Roman Catholic Perspectives (Theology and the Sciences)

Unique among contemporary resources, the landmark Systematic Theology and its distinguished contributors present the major areas or loci of Roman Catholic theology in light of contemporary developments, especially the sea-change since Vatican II thought, the best new historical studies of traditional doctrines and Scripture, and the diverse creative impulses that come from recent philosophy and hermeneutics, culture and praxis, and ecumenical contacts.

This new volume combines and updates both previous volumes, incorporates into the framework nearly twenty years of fresh thought and bibliography in each area, and adds revisions to key articles to take account of a diverse, fluid, and postmodern situation.
