Coping with Climate Change: Principles and Asian Context Ramesha Chandrappa, Sushil Gupta, Umesh Chandra Kulshrestha

The Environmental and climatic issues varies from continent to continent and is unique to Asia.

Understanding the issues does need lot of research and study material which students may not be able to gather due to shortage of time and resources. Hence an effort is made by authors gathering there experience and academic input from renowned universities of world. Climate change is real and coping with it is major concern in coming days. Most of the books written and sold in the past need updating and customizing. The general description of climate change and world will not help the professionals and students. It needs to seen area wise as a professional will work in specific geographic area. Hence an effort is made to collect data from Asia which host most populated countries along with ecological hot spots.
