Networked RFID Systems and Lightweight Cryptography: Raising Barriers to Product Counterfeiting

Networked RFID Systems and Lightweight Cryptography: Raising Barriers to Product Counterfeiting

This book consists of a collection of works on utilizing the automatic identification technology provided by Radio Frequency Identification (RFID) to address the problems of global counterfeiting of goods. The book presents current research, directed to securing supply chains against the efforts of counterfeit operators, carried out at the Auto-ID Labs around the globe. It assumes very little knowledge on the part of the reader on Networked RFID systems as the material provided in the introduction familiarizes the reader with concepts, underlying principles and vulnerabilities of modern RFID systems.
