**Agent-Based and Individual-Based Modeling: A Practical Introduction** Steven F. Railsback, Volker Grimm

Agent-based modeling is a new technique for understanding how the dynamics of biological, social, and other complex systems arise from the characteristics and behaviors of the agents making up these systems. This innovative textbook gives students and scientists the skills to design, implement, and analyze agent-based models. It starts with the fundamentals of modeling and provides an introduction to NetLogo, an easy-to-use, free, and powerful software platform. Nine chapters then each introduce an important modeling concept and show how to implement it using NetLogo. The book goes on to present strategies for finding the right level of model complexity and developing theory for agent behavior, and for analyzing and learning from models.

*Agent-Based and Individual-Based Modeling* features concise and accessible text, numerous examples, and exercises using small but scientific models. The emphasis throughout is on analysis--such as software testing, theory development, robustness analysis, and understanding full models--and on design issues like optimizing model structure and finding good parameter values.

- The first hands-on introduction to agent-based modeling, from conceptual design to computer implementation to parameterization and analysis
- Provides an introduction to NetLogo with nine chapters introducing an important modeling concept and showing how to implement it using NetLogo
- Filled with examples and exercises, with updates and supplementary materials at <http://www.railsback-grimm-abm-book.com/>
- Designed for students and researchers across the biological and social sciences
- Written by leading practitioners

Leading universities that have adopted this book include:

- Amherst College
- Brigham Young University
- Carnegie Mellon University
- Cornell University
- Miami University
- Northwestern University
- Old Dominion University
- Portland State University

- Rhodes College
- Susquehanna University
- University College, Dublin
- University of Arizona
- University of British Columbia
- University of Michigan
- University of South Florida
- University of Texas at Austin
- University of Virginia

### **From reader reviews:**

#### **Justin Price:**

Book is definitely written, printed, or highlighted for everything. You can know everything you want by a e-book. Book has a different type. As we know that book is important thing to bring us around the world. Next to that you can your reading expertise was fluently. A publication Agent-Based and Individual-Based Modeling: A Practical Introduction will make you to be smarter. You can feel much more confidence if you can know about anything. But some of you think that open or reading some sort of book make you bored. It's not make you fun. Why they are often thought like that? Have you seeking best book or suited book with you?

#### **Denise Zimmerman:**

Information is provisions for anyone to get better life, information nowadays can get by anyone on everywhere. The information can be a know-how or any news even a concern. What people must be consider whenever those information which is inside former life are difficult to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you receive the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All those possibilities will not happen within you if you take Agent-Based and Individual-Based Modeling: A Practical Introduction as your daily resource information.

#### **Tony Jacobson:**

The book untitled Agent-Based and Individual-Based Modeling: A Practical Introduction contain a lot of information on this. The writer explains your girlfriend idea with easy way. The language is very easy to understand all the people, so do certainly not worry, you can easy to read that. The book was published by famous author. The author gives you in the new age of literary works. You can easily read this book because you can read more your smart phone, or model, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can open up their official web-site as well as order it. Have a nice study.

#### **Dwight Hancock:**

As a college student exactly feel bored to help reading. If their teacher expected them to go to the library or make summary for some guide, they are complained. Just small students that has reading's internal or real their passion. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see colorful photographs on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Agent-Based and Individual-Based Modeling: A Practical Introduction can make you really feel more interested to read.
